

Project Summary

Title	Understanding the gender dimensions of the impact of climate change on agriculture and adaptation among small holder farmers in Uganda
PI	Dr Margaret Najjingo Mangheni, Makerere University, Department of Agricultural Extension/Education, P.O. Box 7062 Kampala Uganda E mail: mnmangheni@agric.mak.ac.ug Tel. 256 772 483803
Co-researchers	Dr Bernard Bashasha Makerere University, Dept. of Agricultural Economics and Agribusiness Email: bashaasha@agric.mak.ac.ug Dr Majaliwa J.G.M. Makerere University Institute of Environment and Natural Resources P.O. Box 7062, Kampala-Uganda Email: majaliwam@gmail.com
Purpose	The overall objective of the study is to determine the gender dimensions of the impact of climate change on agriculture and small holder farmers' knowledge, innovations and adaptations to climate variability/change.
Project Summary	Gender dimensions of the impact of climate change on agriculture and adaptation are not well understood. Therefore, the overall objective of the study is to determine the gender dimensions of the impact of climate change on agriculture and small holder farmers' knowledge, innovations and adaptations to climate variability/change. A household survey together with an in-depth case study will be used to study 2 purposively selected districts that have been severely affected by climate change. The study will target women students and produce 2 Master's degree theses, 1 graduate with MSc. Agricultural Extension Education, 1 graduate with Masters in Agribusiness Management, at least 3 journal articles, and 1 policy brief.
Country and Specific Location(s)	Uganda
Participating Institutions	National Environment Management Authority (NEMA), Makerere University
Start Date	October, 2009
End date	October 2011
Amount of Funding	USD 59,955
